

Safety measures instituted at Wabi Iron & Steel Corp. for protection against Covid-19.

- We have implemented a relational screening process that includes a series of assessment questions including a non-invasive temperature scanning process at the beginning of the work day for all employees entering the facility.*
- We have limited access to our facility to employees only, however for essential visitors and contractors we ask that face coverings and gloves be worn while on site.*
- We have increased the level of disinfectant cleaning of our equipment, common surfaces and the general environment within our facilities.*
- We have staggered the company break times.*
- We are distributing disinfectant wipes and hand sanitizer.*
- We are allowing employees that can perform their tasks remotely, to work from home.*
- We have restricted access to our plant and office facilities to employees only.*
- We have streamlined business travel for our employees.*
- We have placed tight controls on delivery people entering our property.*
- We are keeping our employees up-to-date on CoVid-19 issues as they arise including: education and direction with regard to preventative measures like personal health, symptomology, physical distancing, hand washing, controlled coughing and sneezing, mental health first aid and directing employees to stay home if they are not feeling well or consider they may be a risk to others.*
- In cases when self-isolation is recommended by a health professional, Wabi assists employees in securing sickness benefits through instituted Governmental procedures.*

- *Site visits must be arranged through the EHS Technologist no less than 1 week prior to the scheduled visit date.*
- *An assessment questionnaire will need to be completed and returned to the EHS Technologist ahead of the visit date. This will be forwarded to the perspective visitors electronically. An email address will be required. **Please note : Based on the response to the assessment questions, access to the facility may be denied for the scheduled visit date.***
- *Only pre-scheduled visitors will be permitted to enter Wabi's facility and only for essential business services.*
- *Upon entry to the Wabi facility, approved visitors will have their temperature confirmed via infra-red thermometer and will be required to wear a face mask and disposable gloves (supplied by Wabi) while on site.*
